Subject: Kinesense Video Investigation Solution for the Ugandan Police Force

Pages: 6 inc

Dear Mike

Further to my visit, please find enclosed some price indications and comments in relation to the issues I saw during my visit.

Substantial financial investment has taken place within Kampala, regarding CCTV. 5000 HD cameras deployed, with a further 2500 planned. Not taking into account the plethora of other state owned and private sector cameras, this investment presents a huge opportunity to boost public confidence.

In order to maximise the benefits of such a wide deployment of cameras, in terms crime reduction, crime prevention and the bringing of more offenders to justice, careful consideration must be given to post production investigation (ie - dealing with the generated footage).

The Kinesense Investigation Platform (LE) offers law enforcement professionals, the unique opportunity to retrieve, review, report and manage CCTV, within an evidential and fully secure environment. Our software is tried and tested and utilised by over 100 law enforcement agencies, worldwide.

I have enclosed prices for Kinesense LE. If you are interested in additional modules as discussed during my visit including Face detection, recognition and ANPR, please let me know and I will amend the quotation.

Please let me know if you require any additional information.

Kind regards,

Gary

Kinesense Video Investigation Solution

Kinesense reserves the right to charge the Buyer interest for the late payment of any sum due under this Agreement at the rate of 2 per cent above the Bank of Ireland base rate.
- (iv) The licence fee is based on a subscription basis and is payable in advance for twelve consecutive months, unless stated otherwise.
- (v) The start date for the licence fee is 1-month post purchase order or installation date, whichever is sooner.
- (vi) Professional services for installation, training, technical support and development are chargeable separately to the licence fee.

Buyer & end user responsibilities

- (i) The end user agrees to adhere to the Kinesense end user licence agreement (EULA) of Kinesense. The EULA comes in to force when the product is installed and the 'I Accept' button or check box is presented with the EULA terms and conditions and clicked on, or earlier, when any of the Products are used and shall remain in force until the licence expires. Where the buyer installs the licence for the end user, they will ensure that the end user is aware of the licence terms and conditions.
- (ii) The end user shall be considered the data controller and as such shall be responsible for content of any data processed by Kinesense products.
- (iii) The end user shall own all rights, title and interest in and to all content imported to the Product and shall have the sole responsibility for the legality, reliability, integrity accuracy and quality of such content.
- (iv) Where the licence fee is sold as a named user licence, the end user is responsible for providing access to named authorised

users and ensuring that multiple users do not use the same named user log ons. If the end user becomes aware of any violation of this clause by a named user, they agree to terminate such user access to the Products.

- (v) The end user will ensure that Product users are always educated and trained in the proper use and operation of the Products and that the Products are used in accordance with the Kinesense manuals and instructions.
- (vi) The end user shall provide all necessary co-operation in relation to these terms and conditions and provide all necessary access to such information as Kinesense may require to the Products including but not limited to content, security access information and Information technology configuration.
- (vii) The end user will not to make a permanent or temporary copy of or to disassemble, de-compile, reverse engineer or create derivative works based on the whole or any part of the Product.
- (viii) The end user not to create any software which is substantially similar in its expression to the Product or for any other act which infringes copyright.
- (ix) The end user shall take all steps reasonably necessary to ensure that no person or entity has unauthorised access to the Product.

Cancellation

- (i) An order cannot be cancelled once delivered. Prior to delivery. Kinesense must receive written notice and request for cancellation stating the reason.
- (ii) Buyer shall be liable for payment of the following charges to Kinesense in the event of cancellation: costs up to the date of cancellation + 15% of the contract value.

Limitation of Liability

- (i) Kinesense warrants that at the time of sale, it will have title to sell the Products to the buyer; and the products sold to the Buyer will conform with the respective specification and/or product as trialled.
- (ii) Kinesense liability shall be limited to either the replacement of the Product concerned; or at the option of Kinesense, reimbursement of the Price.
- (iii) Kinesense shall have no further liability to the Buyer
- (iv) Nothing in these terms and conditions shall exclude or limit the liability of the Kinesense for death or personal injury resulting from the negligence of the Kinesense or any of its employees or agents, nor shall they operate to exclude or limit any statutory rights which cannot be legally excluded or limited, including the statutory rights of a consumer.

Copyright, Patents, Trademarks & Name

- (i) The use of any patent number, trade mark, name or description to any goods shall not be deemed to warrant that such patent, trade mark, name or description as valid.
- (ii) Buyer may not modify, reproduce, decompile, reverse engineer or transfer equipment or documentation supplied without our prior written consent

Disclaimer

Kinesense makes no warranty or representation, either expressed or implied, with respect to the Software or its contents, quality, performance, merchantability, or fitness for a particular purpose. Buyers and End users should ensure that they have trialled the Products in advance of purchase to ensure their needs are met.

Face recognition technology, like any biometric application, cannot provide 100% recognition accuracy. The solution should be used only by trained personnel.
