Re: Kinesense CCTV Video Enhancement Software - Meeting request

5th March 2019

Dear Sir, Masterlinks Uganda Ltd. requests an appointment with the Uganda Police Force to present and demonstrate a CCTV Video Enhancement software system. The solution is sold by Kinesense Ltd, of Dublin, Ireland, represented in Uganda by Masterlinks.

This solution was developed specifically to assist police forces and security companies with video analysis and is in daily use by more than 60 regional and national police forces around the world. The software enables operators to locate specific events and to enhance picture quality of the recording, regardless of weather or lighting challenges. The system also assists in the process of preparing evidence for submission of cases to prosecuting authorities. Together with Masterlinks, Kinesense will provide local training for staff, full implementation of the software and ongoing support.

The Managing Director of Kinesense, Ms Sarah Doyle is ready to travel to Uganda to meet with the UPF and to discuss details of installation, training and cost implications. Ms Doyle's visit will be for her own costs, the UPF will not incur any charges for this visit.

We are looking forward to an opportunity to share this technology with your expert teams and to enter into a long-term partnership with the Uganda Police Force.

Yours faithfully,

Michael Watkins
Director
